DETAILED ACTION

Information Disclosure Statement

1. The Information Disclosure Statement received 30 March 2004 has been considered.

Please see the attached PTO-1449(s).

Drawings

2. The drawings are objected to because:

There is no element "36" in figure 1 (see page 3, line 28);

There is no element "38" in figure 1 (see page 3, line 29);

In figure 3, "82" should be --80--.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "first", "second" and "third control" signals (claim 1) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Art Unit: 2188

Specification

4. The abstract of the disclosure is objected to because it is greater than 150 words.

Correction is required. See MPEP § 608.01(b).

Claim Objections

5. Claim 1 is objected to because of the following informalities:

As per claim 1, all instances, "the DRAM array" should be --the at least one DRAM array--.

As per claim 1, lines 8 and 16, "the SRAM array" lacks antecedent basis and it is not clear whether Applicant is referring to the "first" or "second" SRAM array of line 3. The Examiner suggests changing "the SRAM array" to --the first and second SRAM arrays--.

As per claim 1, "the SRAM array" in line 23 lacks antecedent basis and should be --one of the SRAM arrays--.

Appropriate correction is required.

Double Patenting

6. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Art Unit: 2188

7. Claim 1 is provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of copending Application No. 09/642,546. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.
